

Applied Archaeological Methods on Several Projects in Western Washington

When
October 20, 2015
7 pm to 9 pm

Location
Amec Foster Wheeler
11810 North Creek Parkway N
Bothell WA 98011

Free to public.

Sponsor
Amec Foster Wheeler Environment & Infrastructure, Inc.

Please join Amec Foster Wheeler at their office location in Bothell for an evening discussion on the applied archaeological methods and results from several of our recent projects in western Washington. Our work on both precontact and historic sites will be discussed in the context of contract archaeology and will provide an opportunity to explore key issues that are impacting our non-renewable cultural resources.

Jason Cooper, Tyler McWilliams, and Tim Gerrish screening and digging with reservoir in background.

Completed excavation block at Eagle Gorge Terrace Site. Howard Hanson Dam along Green River (now reservoir). U.S. Army Corps of Engineers Seattle District project.

Tim Gerrish taking notes.
