Foreword

The early settlers of Cape Cod were a thrifty and honest people, a true type of the so called "Old New England Yankees," and the architecture that they created is an honest solution of their requirements. Their wants were few and the homes they built filled their needs perfectly.

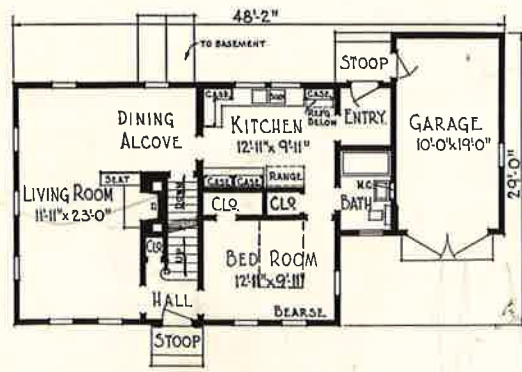

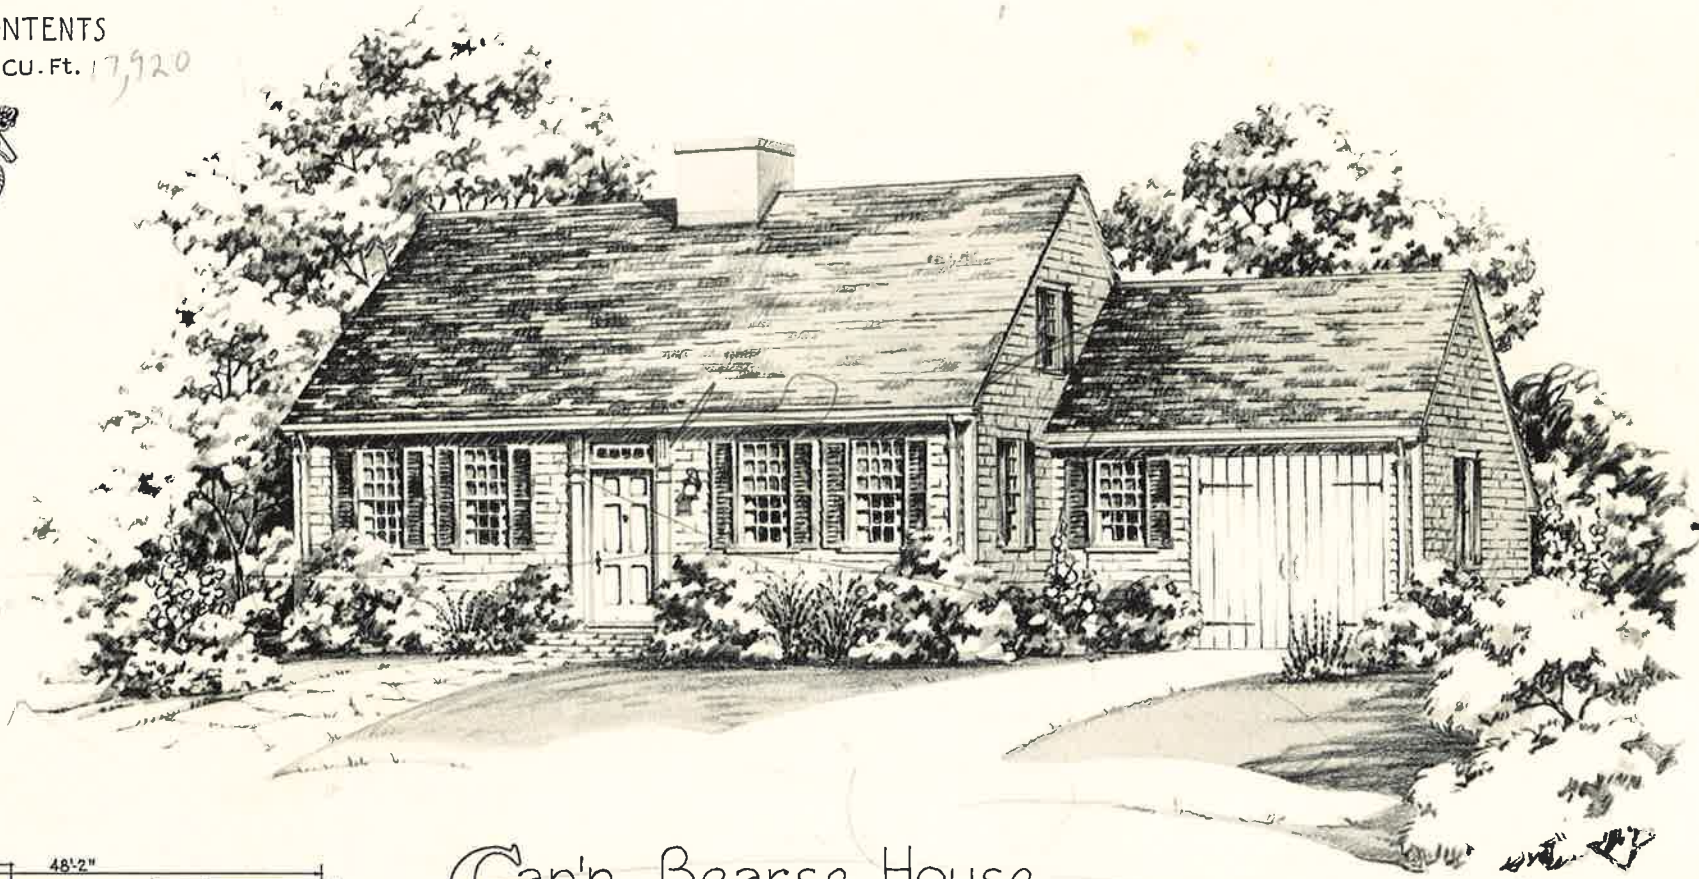

It should be borne in mind, however, that great strides have been taken in our living conditions during the past two and one-half centuries, so accordingly the plans presented in this booklet are not true reproductions, which would be impractical; but are adaptations that should, when placed in a proper setting, look as if "they really grew" on Cape Cod.

It is ordinarily difficult to present a standardized plan that will meet with the approval of all, because of individual tastes and needs. However the architect who designed and planned the Cape Cod homes illustrated in this book is to be commended for his understanding and architectural skill displayed.

The splendid range of charming Cape Cod cottages featured herein were designed for our plan service department by Walter M. Gaffney of Hyannis, Massachusetts in the heart of the Cape Cod district and result from his long and successful experience in studying and designing Cape Cod homes.

CUBIC CONTENTS

22,400 CU. Ft. 17,920

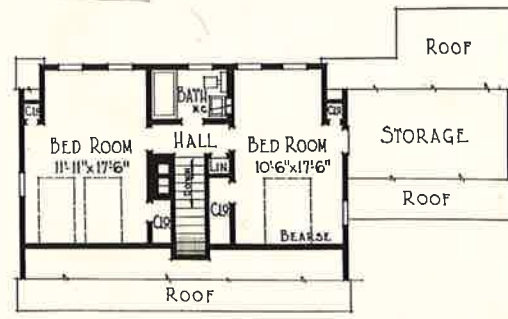

First Floor

Cap'n. Bearse House

Seldom is found a combination of exterior beauty and an ideal floor layout that gives more than this Cape Cod home. Large, well arranged rooms, modern equipment and an attached garage are features of this home.

A Friendly Message to Home Builders

Building today is just as easy as buying an automobile or paying rent. Architects have concentrated more on small home design in the past fifteen years than in the previous fifty. Modern materials save actual building time — and the new FHA financing offers the lowest charges ever generally available in this country. We have a wide selection of plans prepared by licensed architects, complying fully with FHA requirements, and readily adaptable to your own individual preference. All in all, NOW is the time to build!

Home financing has gone through a transformation making possible the financing of a home on the most practical, desirable and economical terms in the history of the country. FHA insured loans are available under one mortgage amortized over a period of fifteen or twenty years. Financing charges are lower than ever before in our history. Down payments are smaller and longer repayment periods are granted on moderate cost homes. Every employed person with family responsibility should have, and now easily can acquire, a home of his own.

Come In—Let's Talk About the Home You Want!

Remember we can arrange every detail for you — design, blue prints, specifications, material, contractors and financing. The home YOU want — designed by licensed architects in compliance with FHA requirements — can be ready for you to move into within an astonishingly short time and best of all your rent pays for it — clear. Costs are at this time so low that it is true economy and a shrewd investment to build NOW.
