# Fair Dome To Feature New Marina

The Surf and Sand Marina in Edmonds Waterfront, is one of the fastest-growing marinas in the Greater Seattle area. The marina, with 300 feet of waterfront, provides the boating public with the finest and most complete sales, service and storage facilities in the area.

Surf and Sand will be the "Home of the Dome." The popular Ford geodesic dome from the Seattle World's Fair is now in the process of being erected. This modern structure has 9500 square feet of floor space, unimpeded by posts. The building is 110 feet in diameter and 45 feet in height. The same outside ornamental lights that made it a hit at the Fair will be a part of the structure and make it a distinctive landmark of the Edmonds waterfront.

In addition to the "Boat Pavilion," a new display room has been added to the main-store building. These areas with the present store facilities, allow the boating customers to leisurely view the complete line of marine merchandise and equipment. Being completed is a new office for the Roy L. Peterson Associated Companies.

Surf and Sand Marina is exclusive dealer for the Greater Seattle area for Uniflite inboard cruisers, Grady-White inboard and outboard cruisers and Higgins inboard cruisers.
