

Built Environment Summit: Creative Mitigation Recap

What is mitigation?

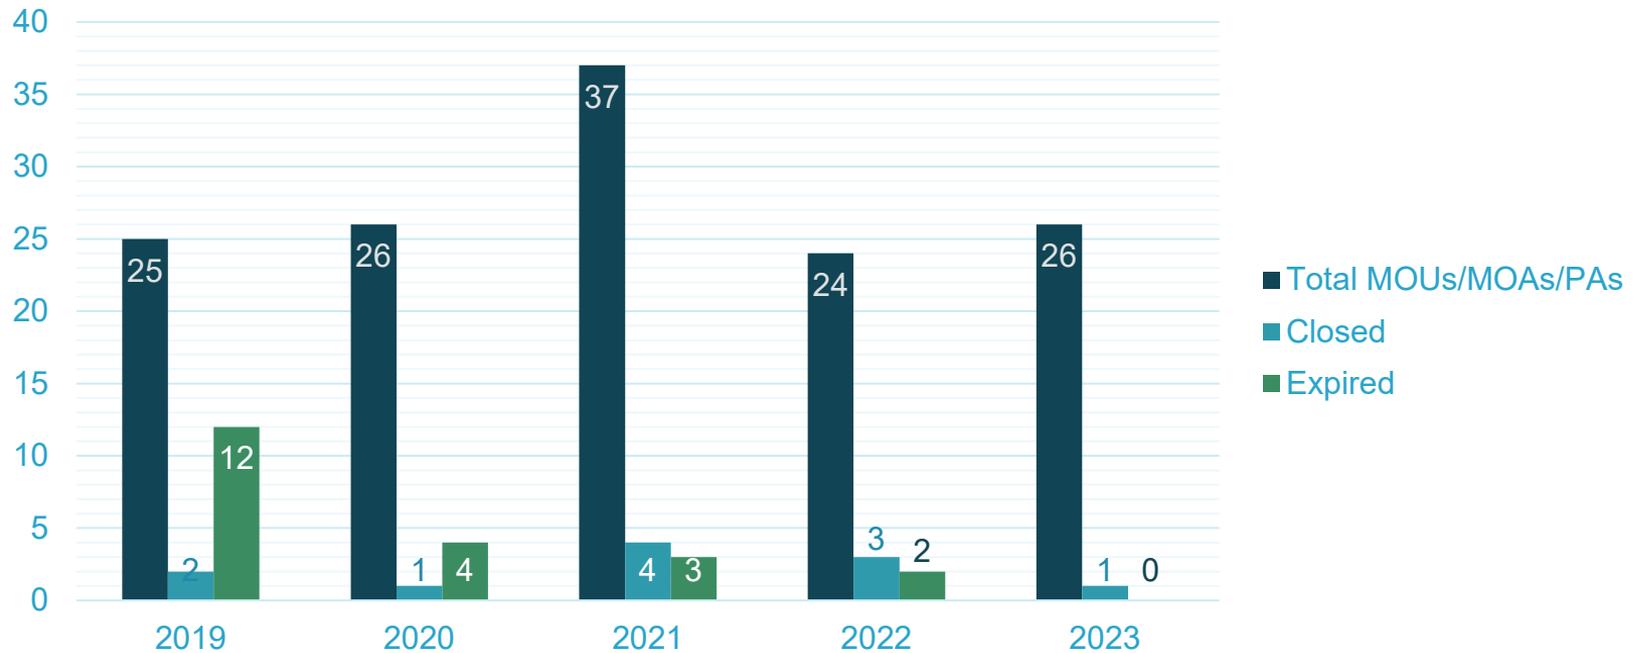

- Mitigation is an important product of the regulatory consultation process
- When it is not possible to avoid or minimize adverse effects/impacts, mitigation is required
- When required through DAHP consultation, we will lay out the mitigation plan in an MOU/MOA

DAHP MOUs/MOAs in Numbers

THE FUTURE of PRESERVATION

Built Environment Preservation Summit

TOPIC:

**Creative
Mitigation**

FREE

**SAVE
THE DATE**

APRIL 18, 2024

Schedule coming soon!

**LOCATION: SOUTH PUGET SOUND COMMUNITY COLLEGE
- LACEY CAMPUS**

FORMER WELL SAVED, COVERED AND INTERPRETED - NEW YORK CITY

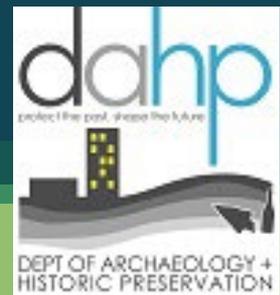

What was discussed?

- **Case Studies:**
 - WSDOT
 - BPA
 - ODOT
- **Mitigation Speed Dating**
 - Embodied carbon reports
 - 3D Models
 - HABS/HAER/HALS
 - Storytelling through oral history
 - Website technology/story maps
 - Deconstruction/salvage
 - Engaging the public/CLGs in mitigation ideas and implementation

DAHP BE Mitigation Standards

What is creative mitigation?

- More engaged with stakeholders
- Listening to stakeholders!
- Can help lead to broader public involvement, increased appreciation of the past, and ultimately, to greater public pursuit of historic preservation
- Looking beyond the 'usual' forms of mitigation

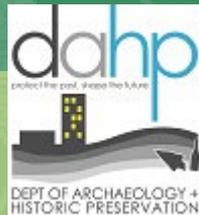

Mitigation Plan Considerations

- Consider the significance of the affected property
- Consider the needs of all parties. What partnerships are available? Who are the stakeholders?
- Consider the public benefit
- Consider mitigation that enhances knowledge and protection of resources
- Consider cost

DAHP's Three-Pronged Approach

1. Documentation
2. Public Education/Interpretation
3. Continued Physical Preservation

1. Documentation

- **DAHP Level II Documentation or HABS/HAER/HALS**
- **Multiple Property Documentation**
- **Additional inventory work**
- **Embodied Carbon Report**
- **Biographies**
- **National Register Nominations**
- **Historic Structure Report**
- **Resource/Typology Guidebooks**
- **Historic Context Development**

2. Education/ Interpretation

- Museum exhibits
- HistoryLink essays
- Lecture series
- Documentaries/ Short Videos
- Integration of history - inspired art/salvaged items
- Coffee table book
- Training/workshops
- School curriculum
- Walking tours/site tours
- Internship programs
- Website development
- Interpretive signage
- GIS story map

The Indian foods, the landscape, the geography, the rivers of how they meet, dictated to us of how we were to comport ourselves in relationship with the land and the resources.
-- Nakia Williamson

3. Continued Physical Preservation

- Additional consultation to ensure compatible replacement buildings/structures
- Review of future phases of projects, even if not under regulatory review
- Support for preservation non-profit organizations (Facade improvement grant, Valerie Sivinski Fund)
- Moving, deconstructing, or salvaging resources
- Preservation covenants
- Support for WISAARD development and enhancement
