Pittsburgh Barn and Roof Paint

*Prepared Ready
for Use*

Made especially for warehouses, factory buildings, elevators, barns, roofs, either metal or wood, corn cribs, fences and all exterior painting where a good, durable and economical paint is required.

The colors are all clear toned and always uniform.

Pittsburgh Barn and Roof Paint is mill ground by powerful machinery and consequently has greater covering capacity than ordinary paints or those mixed by hand.

The particles being ground extremely fine and the vehicle more thoroughly incorporated insures great covering capacity, durability and economy.
