

Title: Archaeological Field Technicians

Date: October 2, 2019

Location: Lacey, WA

Statistical Research, Inc. (SRI), a cultural resources management (CRM) consulting firm, provides comprehensive CRM services to private and government clients at the federal, state, and local levels throughout the western United States from offices in Washington, New Mexico, Arizona, and California. SRI has four (4) temporary, hourly positions available for archaeological Field Technicians headquartered from SRI's Lacey, WA office.

Minimum Qualifications and Experience

Qualified candidates should possess, at minimum, a bachelor's degree in Archaeology, Anthropology, or a related field and have completed an accredited archaeological field school. Candidates must also have a minimum of 1-2 years of field experience (i.e., survey, testing, and data recovery) and be physically fit and able to perform physically demanding tasks in adverse environmental conditions (i.e., extreme heat or cold). Candidates should also have good organizational skills, a positive attitude, strong work ethic, and willingness to learn and execute new tasks.

Job Description:

Reporting to the Project Director and Crew Chief, archaeological Field Technicians are responsible for conducting archaeological survey, monitoring, testing, and data recovery, artifact collection, test unit and feature excavation, and documentation.

Pay rates are based on individual qualifications and experience, and fieldwork is anticipated to last 6 - 8 weeks.

How To apply

Applications should be submitted via e-mail to srijobs@sricrm.com with "Archaeological Field Technician — Lacey, Washington" referenced in the subject line, and should include a cover letter, resume of relevant experience, and references (with contact information, including email addresses and telephone numbers). Applications will be accepted until the positions are filled and only applications submitted via srijobs@sricrm.com will be considered.
