

# YOU SAVE BECAUSE YOU ADD THE LINSEED OIL YOURSELF!

Because you add the bulk of the Linseed Oil yourself, you reduce the manufacturing cost of this paint and thus get a fine-quality Barn Point at a cost per gallon that is considerably lower than what you have to pay for the same point if the Linseed Oil were mixed in at the factory. This point is exceptionally well ground, and is of a smooth, heavy paste consistency when you receive it. It mixes easily and flows on freely.

**Y**OU add from 2 to 3 quarts of Linseed Oil to each gallon of this point, depending upon the condition of the surface to which it is to be applied. In other words, each gallon you buy of this paint actually gives you from 1 1/2 to 1 3/4 gallons of point ready for use.

Inasmuch as the proportion of Linseed Oil contained in any barn point greatly determines the life and durability of that point, you actually control the life and durability of this point because you yourself add the Linseed Oil. With this point you can protect and beautify your barns and buildings at a very moderate cost!

Each Original Gallon when reduced as directed will Cover from 500 to 550 Sq. Ft. of surface, 2 Coats, when applied on a surface in good condition for repainting.

BRITE RED

**Easy to Apply!  
Lasts for Years!**

## EASY TO APPLY . . .

This paint is easy to brush on, covers well and spreads far. It dries dust-free in about 8 hours and may be recoated (if desired) in from 4 to 7 days, depending upon drying conditions.

---

## TOUGH! DURABLE! . . .

This rugged coating resists wear, weather and water, and you can depend upon it for long-lasting beauty and protection. Your buildings last longer and require fewer repairs when properly painted.

---

## BRIGHT RED . . .

Turn to the inside of this folder and notice how clear, bright and attractive this finish is. This finish dries smoothly and has a fine gloss. It's good-looking, as well as tough and durable.

---

## USE ANYWHERE . . .

In addition to barns, this finish is ideal for fences, outbuildings, garages, sheds, roofs and other surfaces of either wood or metal where a rugged, weather-resisting finish is desired.

---
