The following numbers, **98-24-149 to 98-24-159**, all blue prints or blue line copies, were stapled together as a complete set of plans for the Peshastin Fruit Growers Association's Cold Storage Plant. The edges of the individual sheets are worn and ragged, with some tears, but mostly the prints are legible and are in fair to good condition. Numbers 98-24-158.1 to 98-24-158.4 consist of a set of corrected versions of 98-24-149.2, 98-24-149.3 and 98-24-149.4. It also had been stapled to the top of this very fat and cumbersome roll of plans, but was removed to make cataloguing easier. It remains as a stapled set.

Note: Numbers **98-24-149.1 to 98-24-149.8** make up a set of drawings from Solberg's studio, and are numbered as a set of sheets one through eight. The paper is brittle and the edges are dog-eared, mainly because these sheets are larger than others in the roll and took the brunt of handling. Clippings from Architectural Magazines

Description

This box contains a more than 13" high stack of mostly out-of-order clippings from various architectural magazines and some catalogues, mostly from mid-1920s (few from 1920) to late-1930s, few from early 1940s. Although it is possible to sort through the material and categorize by subject matter—such as marquis and doorways, window treatments, living rooms, small houses, large commercial buildings, college buildings, et alia, it was thought best to leave as is. Some clippings, however, had been separated into bunches and labelled by Solberg. These groupings have been retained and catalogued as Folders 1 through 7.
