OK

R. F. Gearhard  
Notary Public in and for the State  
of Washington residing at Seattle

No Practitioner is expected to sign this recommendation who does not know the applicant personally, and who is not willing to supply additional information concerning his or her character, standing and education, upon request from the Department of Licenses.

# LETTER OF RECOMMENDATION

City of Seattle  
Nov 28 1934

To the Department of Licenses of the State of Washington:

This certifies that I have known Jimmie F Bellamy 8 years; that I personally know him while he resided at Seattle in the State of Wash during the years of '26 to '28, during which period he was engaged in active practice of Architecture as a student of Architecture; that he is of good moral and professional character; that he is free from habits liable to interfere with his professional services; that his standing was good in that community and is good in the community in which he now lives; that he is worthy of receiving a license to practice Architecture in the State of Washington.

G.18218 License No  
Trans. Rec. # 212873

Name Ronald P Thomas  
Address 6153 Arden Blvd  
Licensed under the laws of Washington  
(Name of state)  
To practice Architecture

Subscribed and sworn to before me this 29th day of November 1934

- Mr. William Arild Johnson, 3506 Broadway, Everett, Washington

## CONTRIBUTIONS TO PROFESSIONAL LITERATURE, RESEARCH, DESIGN, PROFESSIONAL ETHICS, INVENTIONS, ETC.

Give Title of Article, Publication, Date of Publication and Publisher.

My office has been located in Seattle since I acquired my license in 1934.

My work has been that of a general architectural practitioner, designing and supervising construction of residences (large and small), restaurants, food processing plants, warehouses, stores, gasoline and tire service stations, office buildings, churches, mausoleums, auto courts, shopping centers, specialty shops, apartment houses, dairies, cold storage plants, over 50 safeway stores, machine works, etc.

NOTE: Senior applicants are expected to use above space to give a brief statement concerning their record in practice preceding the date of this application. This statement should include office locations, partnerships, and any other information which the applicant deems essential to a fair adjudication of his record in practice.

The undersigned, being duly sworn, upon his oath deposes and says that the foregoing statements are, to the best of his knowledge and belief, true and made in good faith.

NAME Tennys BellamySTATE OF WashingtonCounty of KingI, Walter J. Jordan

a Notary Public in and for said County, in the State aforesaid.

DO HEREBY CERTIFY THAT Tennys Bellamy, personally known to me to be the same person whose name is subscribed to the foregoing instrument, appeared before me this day in person, and acknowledged that he signed, sealed and delivered the said instrument as his free and voluntary act, for the uses and purposes therein set forth.

GIVEN under my hand and Notarial Seal this 21<sup>st</sup> day of April, 1958.

(SEAL)

Walter J. Jordan  
Notary Public

NOTE: Fill in this form with black drafting ink or with typewriter backing with a carbon sheet.

My Commission Expires Oct. 22, 1958

Seattle 7, Washington

ARCHITECT REFERENCES

13. I have had the pleasure of knowing Mr. Tennys Bellamy since our entry into the school of Architecture at the University of Washington in 1924.

Our association continued during further study in Europe and through a period of early experience on the eastern seaboard.

My respect for Mr. Bellamy as a dedicated architect and friend is of the very highest order, and this, along with my familiarity with his highly developed design and structural sense, make it a great pleasure to recommend him for favorable consideration by the NCARB.

Dated  
April 21, 1958

(Signed) George Vernon Russell, F.A.I.A.  
3275 Wilshire Blvd.  
Los Angeles 5, California

14. I have been personally acquainted with Mr. Bellamy since 1924. He opened his own office for independent architecture practice in about 1935 or 1936, and has maintained it ever since.

Mr. Bellamy has always maintained high standards.

His integrity is above question and he has a great deal of professional training and ability. It is my belief that he will do a good job with any professional trust extended to him.

Received  
April 24, 1958

(Signed) John S. Villesvik, Architect  
109 North 3rd Street  
Yakima, Washington

15. 23 years that I know of (The number of years Mr. Johnson has known Mr. Bellamy to be engaged in the independent practice of architecture.)

His work is of high calibre and standards of design and construction, high technical proficiency.

His integrity is of the highest; he could be trusted completely with any professional trust he would accept. He is a man of upstanding character and repute.

Received  
April 28, 1958

(Signed) William Arild Johnson  
3506 Broadway  
Everett, Washington

The University of Washington  
on the recommendation of the Faculty, and by virtue of the power vested in  
the Board of Regents, has this day admitted

**Tennys Francis Bellamy**

in the degree of

**Bachelor of Architecture**

and has granted him all the honors, rights and privileges thereto pertaining.

In Witness Whereof, the lawfully constituted authorities of the University have hereunto set their  
hands and caused the seal of the University to be affixed.

Given at Seattle, in the State of Washington, this  
eleventh day of June in the year of our Lord  
one thousand nine hundred and twenty-eight  
and of the University the sixty-eighth.

## Plan 102

### THE HOUSE ON THE COVER

TENNY FRANCIS BELLAMY

*Architect*

## THREE FLOORS FOR COMFORTABLE LIVING

The site for this house had more than the average slope; the architect's solution was to build on three levels. As each level serves a particular function, the result is much more satisfactory than the ordinary three story house provides.

As can be seen by glancing at the first floor plan above, this floor contains all the rooms required for day to day living: bedrooms, living-dining room and service area. In addition to the guest room on the lower floor, there is a library on the main floor which can double for that purpose.

The basement provides sufficient space for a large laundry and recreation room as well as the guest room, and the latter rooms are as well lighted as could be desired. As can be seen in the photograph above, the recreation room and guest room open out to a terrace on the same level, and the main floor has a wide balcony-porch for outdoor living. Space for a dark room is also provided in the basement, and an auxiliary kitchen for use when entertaining in the recreation room.

From its two different aspects, front and back, the house presents a quite different appearance, as the front is stone veneer and the back all wood construction. The roof is hand split shakes. The windows are made by Fentron Steel Works.

The kitchen is completely electric, furnished with General Electric appliances.

*Plan 125*

## A Two Story House with Bedrooms on the Ground Floor

TENNYS FRANCIS BELLAMY

*Architect*

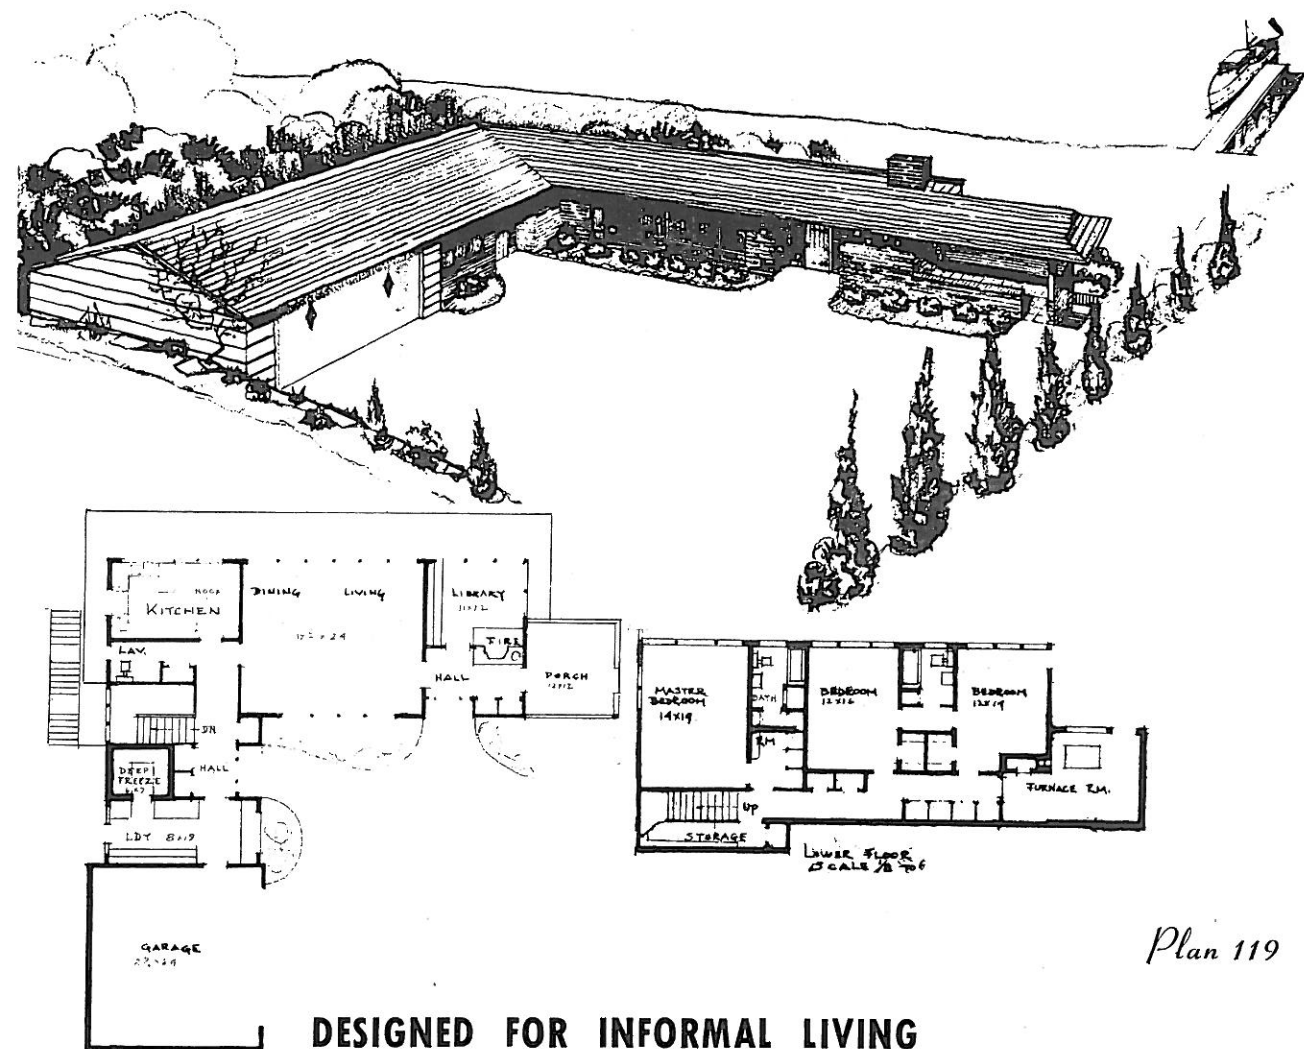

The combinations which are devised for hillside lots are numerous and diversified. This one puts the bedrooms below instead of above in the ordinary way, which neatly solves a problem of circulation. There would have been much climbing to and from the most used main floor had it been put on the lower level.

The combination of stone and hand split cedar siding blends nicely with the background of green trees and blue lake just beyond the house. The roof is hand split shakes, and the windows Fentron steel sash. Both chimney and fireplace are Roman brick with stone veneer. The interior is mahogany with a varnish finish. The floors are hardwood, partially covered with asphalt tile. Heating is by General Electric.

Total Floor Area

1100 Sq. Ft.

*Plan 119*

FENNYS FRANCIS BELLAMY

Architect

E. M. BUCHHOLZ, Builder

Living area:

1700 sq. ft.

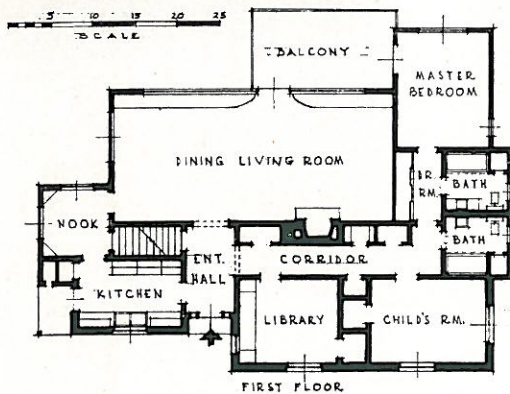

The owner of this house asked Architect Bellamy to design a home which would satisfy his requirements as a hunter, fisherman and yachtsman. Located on a very steep lot leading down to Lake Washington, it had to be on two levels; with a wide view to be taken advantage of, it is planned so that all the major rooms face the lake.

The house is frame construction on a concrete foundation. The exterior is finished in brick veneer and hand split cedar siding with natural finish. The roof is Johns-Manville asbestos shingles, windows and screens are Fentron Steel products. Porches are finished in quarry tile, and the chimney and fireplace are Roman brick.

The interior of the house has pine woodwork in the living room, walnut in the library and white sand in plaster on the remaining walls. There is no additional finish on the walls except varnish on the woodwork. Floors are oak with carpets covering them.

Heating is by General Electric radiant copper coils in the ceiling, and insulation by rock wool. The kitchen is completely equipped with General Electric appliances.

An interesting feature of the house is the deep freeze room just off the utility area. This built-in freezer is made by York Refrigerator and has a meat capacity of 4 tons. It can hang four deer, and has 30 sq. ft. of shelf space.

## Plan NW-63 *Seattle*

TENNYS FRANCIS BELLAMY, Architect

When an outstanding architect designs his own residence it is a layman's trait, whether born of curiosity or sincere interest, to take a peek within. Here's an opportunity to step inside and explore the home of Architect Bellamy, and it should prove of particular interest to persons planning to build on a hillside site with more than average slope.

This permitted pyramiding the house on three elevations, each serving a distinct and necessary purpose. The first, or street elevation, floor is a complete home within itself, with far more facilities than are found in many. Traffic is well controlled to forestall trespassing and the unusually large living-dining, opening onto balcony, certainly is of sufficient size to prevent congestion at even a most elaborate function.

Let's step in and look over this complete living unit on one of three floors. Kitchen is immediately to the front and left. The entry hall makes directly accessible any room, also stairway to other elevations. On this floor are breakfast nook, living-dining room, library, master bedroom with private bath and dressing room, child's room and a second bathroom.

On the lower floor is recreation room, complete with kitchen, guest room and bath and laundry, with drying space skirting the heating plant. A completely equipped dark room completes this floor.

Climbing to the attic, we find an architect's dream come true... a spacious studio with dormer windows and fireplace (in fact there are three fireplaces, one on each floor) and maid's room with bath. To utilize all space to the fullest, a trunk storage room is tucked in a corner.

Area: 1962 square feet.

### CONSTRUCTION OUTLINE

FOUNDATION—Concrete.	BATHROOM FLOORS AND WALLS—Tile.
CONSTRUCTION—Stone veneer.	HEATING—G. E. hot water.
ROOF—Shake.	BUILDING PAPER—14-lb. asphalt paper.
DOOR AND WINDOW FRAMES—Steel.	LUMBER AND MILLWORK—Fir and hardwood.
PORCHES, STEPS AND WALKS—Stone.	HARDWARE—Schlage.
FIREPLACES—One stone, one marble, one brick.	GLASS AND MIRRORS—W. P. Fuller.
FLOORS—Oak, maple tile.	WINDOWS—Fentron.
INTERIOR WOODWORK—Pine, fir.	KITCHEN—General Electric kitchen, containing all G. E. equipment.
INSULATION—Rockwool.	LAUNDRY EQUIPMENT—Bendix and Ironrite.
PLUMBING—Standard and Briggs.
